Packing List

Before you begin operating your PC, please make sure that the following materials are enclosed:

- 1 USB Cable with water proof Connector
- 2 COM Cables with water proof Connectors
- 1 waterproof Connector for DC-in (Female)
- 1 waterproof Connector for LAN (optional)
- 1 waterproof Connector for audio –Line-out (optional)
- 1 CD-ROM for manual (in PDF format)
- 1 FOX-81 Multi-purpose & Water-proof Panel PC

If any of these items should be missing or damaged, please contact your distributor or sales representative immediately.

Safety & Warranty

1. Read these safety instructions carefully.
2. Keep this user's manual for later reference.
3. Disconnect this equipment from any AC outlet before cleaning. Do not use liquid or spray detergents for cleaning. Use a damp cloth.
4. For pluggable equipment, the power outlet must be installed near the equipment and must be easily accessible.
5. Keep this equipment away from humidity.
6. Put this equipment on a firm surface during installation. Dropping it or letting it fall could cause damage.
7. The openings on the enclosure are for air convection. Protect the equipment from overheating. **DO NOT COVER THE OPENINGS.**
8. Make sure the voltage of the power source is correct before connecting the equipment to the power outlet.
9. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
10. All cautions and warnings on the equipment should be noted.
11. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient over-voltage.
12. Never pour any liquid into an opening. This could cause fire or electrical shock.
13. Never open the equipment. For safety reasons, only qualified service personnel should open the equipment.
14. If any of the following situations arises, get the equipment checked by service personnel:
 - a. The power cord or plug is damaged.
 - b. Liquid has penetrated into the equipment.
 - c. The equipment has been exposed to moisture.

- d. The equipment does not work well, or you cannot get it to work according to the user's manual.
 - e. The equipment has been dropped and damaged.
 - f. The equipment has obvious signs of breakage.
15. DO NOT LEAVE THIS EQUIPMENT IN AN ENVIRONMENT WHERE THE STORAGE TEMPERATURE IS BELOW -20°C (-4°F) OR ABOVE 70°C (140°F). IT MAY DAMAGE THE EQUIPMENT.
16. DO NOT OPEN the sealed Enclosure /case of equipment. Once enclosure is disassembled without approval, it will lead in abnormal operating of water proof gel. For Guarantee of water proof function, please make sure configuration/ peripheral (HDD,RAM, peripherals) has been confirmed to install before shipping.

FCC

Warning!

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution:

There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.

Below Table for China RoHS Requirements
产品中有毒有害物质或元素名称及含量

AAEON Panel PC/ Workstation

| 部件名称 | 有毒有害物质或元素 | | | | | |
|-----------------|-----------|-----------|-----------|-----------------|---------------|-----------------|
| | 铅 (Pb) | 汞 (Hg) | 镉 (Cd) | 六价铬 (Cr(VI)) | 多溴联苯 (PBB) | 多溴二苯醚 (PBDE) |

**General
Information**

1.1 Introduction

FOX-81 Multipurpose & Waterproof panel PC is a high-performance computing and completely fanless solution for applications in outdoor, semi-outdoor, and harsh indoor environment ,that comes with Intel® Atom™ N270 processor, 8.4” wide View-angle display (with sunlight readability), Sealing enclosure(6 sides of IP65 certified) and Water proof I/O connectors for Ethernet , multi-COM port, audio and USB interfaces. In addition, with water resistant bottoms on front panel, FOX has user-friendly interface for brightness control and a variety of optional wireless for real time communication or navigation.

Besides, for system integrators, a simple, complete, compact and highly integrated system helps you smoothly build an industrial grade solution into your applications. By this concept, FOX is design with valuable features (listed in next section) to serve various field of markets such as Vehicle, food factory, slaughter house, Pharmacy Production, Production Plant Hospital Operation Room, and Outdoor KIOSK Public Information Terminal.

With FOX, we believe the end user can optimize the workflow of operations and management in daily business.

1.2 Features

- Onboard Intel® Atom™ N270 Processor
- 8.4" SVGA Color TFT LCD
- Water-proof Sealing: IP-65 Certified
- High Brightness Display-650 Nits (Optional)
- Windows® XP pro, Windows® XP Embedded Support
- Day and Night Mode Display For Power Saving
- Wide Operating Temperature Range
- Ideal for Vertical Application
- Low Reflection Touch Screen for Sunlight Readability
- Water-proof I/O Connector (IP-67 Rating)
- Screen Optional Bonding for Sunlight Readable & Protection

1.3 Specification

System

- CPU Onboard Intel® Atom™ N270
1.6GHz Processor
- Memory SODIMM x 1, Max. 2GB
- LCD / CRT Controller Intel® 945GSE
- Ethernet 10/100/100Base-TX, RJ-45
connector x 1
- M12 water proof I/O Port RS-232 x 1
RS-232/422/485 x 1
USB 2.0 x 2, Audio Line-out x 1
(optional)/ 10/100/1000Base-TX
RJ-45 (optional)
- Storage Disk Drive SATA DOM
- OS Support Windows XP, Windows XP
Embedded

Mechanical

- Construction Metal
- Front Panel Color Silver Gray- RAL9007
- Mounting VESA 75mm holes
- Dimension 10.47" (W) x 7.56" (H) x 2.35" (D)
(266mm x 192mm x 59.8mm)
- Gross Weight 5.5 lb (2.5Kg)

Environmental

- Operating Temperature -4°F~122°F (-20°C~50°C);
-4°F~158°F (-20°C~70°C)
- Storage Humidity 10% to 90%@40°C,
non-condensing
- Vibration 3G Random Operation,
5-500Hz
- Shock 30G peak acceleration (11
msec. duration)/ Operation
- Safety All sides of IP-65 certified
- EMC CE/FCC Class A
- Power Supply Input: DC 9~30V

LCD

- Display Type 8.4" TFT LCD
- Max. Resolution 800 x 600
- Max. Colors 16.7M colors
- Dot Size 0.213mm x 0.213mm
- Luminance 650 nits (FOX-81STT), 450 nits
(FOX-81ST/ HTT)
- Viewing Angle 150° (H) x 150° (V)
- Back Light MTBF 50,000 hours

Touch Screen

- Type 4-wire, low reflection analog

- Resolution 2048 x 2048
- Light Transmission >80% (FOX-81HTT)
>74% (FOX-81STT)
- Lifetime 10 million activations
(FOX-81HTT)
1 million activations
(FOX-81STT)

Note: All AAEON's LCD products are manufactured with High precision technology. However, in all LCD panels there maybe a small number of defective pixels that do not change color. This is a normal occurrence for all LCD displays from all manufacturers and should not be noticeable or objectionable under normal operation. AAEON qualify the LCD panel following industry standard: total 7 dead pixels on a screen or if there are 3 within 1 inch square area of each other on the display.

**Award
BIOS Setup**

3.1 System Test and Initialization

These routines test and initialize board hardware. If the routines encounter an error during the tests, you will either hear a few short beeps or see an error message on the screen. There are two kinds of errors: fatal and non-fatal. The system can usually continue the boot up sequence with non-fatal errors. Non-fatal error messages usually appear on the screen along with the following instructions:

Press <F1> to RESUME

Write down the message and press the F1 key to continue the boot up sequence.

System configuration verification

These routines check the current system configuration against the values stored in the CMOS memory. If they do not match, the program outputs an error message. You will then need to run the BIOS setup program to set the configuration information in memory.

There are three situations in which you will need to change the CMOS settings:

1. You are starting your system for the first time
2. You have changed the hardware attached to your system
3. The CMOS memory has lost power and the configuration information has been erased.

TheFOX-81 CMOS memory has an integral lithium battery backup for data retention. However, you will need to replace the complete unit when it finally runs down.

3.2 Award BIOS Setup

Awards BIOS ROM has a built-in Setup program that allows users to modify the basic system configuration. This type of information is stored in battery-backed CMOS RAM so that it retains the Setup information when the power is turned off.

Entering Setup

Power on the computer and press immediately. This will allow you to enter Setup.

Standard CMOS Features

Use this menu for basic system configuration. (Date, time, IDE, etc.)

Advanced BIOS Features

Use this menu to set the advanced features available on your system.

Advanced Chipset Features

Use this menu to change the values in the chipset registers and optimize your system performance.

Integrated Peripherals

Use this menu to specify your settings for integrated peripherals. (Primary slave, secondary slave, keyboard, mouse etc.)

Power Management Setup

Use this menu to specify your settings for power management. (HDD power down, power on by ring, KB wake up, etc.)

PnP/PCI Configurations

This entry appears if your system supports PnP/PCI.

PC Health Status

This menu allows you to set the shutdown temperature for your system.

Frequency/Voltage Control

Use this menu to specify your settings for auto detect DIMM/PCI clock and spread spectrum.

Load Fail-Safe Defaults

Use this menu to load the BIOS default values for the minimal/stable performance for your system to operate.

Load Optimized Defaults

Use this menu to load the BIOS default values that are factory settings for optimal performance system operations. While AWARD has designated the custom BIOS to maximize performance, the factory has the right to change these defaults to meet their needs.

Set Supervisor/User Password

Use this menu to set Supervisor/User Passwords.

Save and Exit Setup

Save CMOS value changes to CMOS and exit setup.

Exit Without Saving

Abandon all CMOS value changes and exit setup.

You can refer to the "AAEON BIOS Item Description.pdf" file in the CD for the meaning of each setting in this chapter.

Chapter

4

**Driver
Installation**

There are several installation ways depending on the driver package under different Operating System application. The Auto-run program will run automatically. However, if the Auto-run program cannot be run smoothly, please follow the steps below to install the drivers:

- Step 1 – Install INF Driver
- Step 2 – Install VGA Driver
- Step 3 – Install LAN Driver
- Step 4 – Install Audio Driver
- Step 5 – Install Touch Screen Driver

USB 2.0 Drivers are available for download using Windows Update for both Windows XP and Windows 2000. For additional information regarding USB 2.0 support in Windows XP and Windows 2000, please visit www.microsoft.com/hwdev/usb/.

For installation procedures of each driver, you may see the details in the following.

4.1 Installation

Insert the FOX-81 CD-ROM into the CD-ROM drive and install the drivers from Step 1 to Step 5 in order.

Step 1 – Install INF Driver

1. Click on the **Step 1 - INF Update Utility v8.2.0.1014** folder and double click on the **Setup.exe**
2. Follow the instructions that the window shows
3. The system will help you install the driver automatically

Step 2 – Install VGA Driver

1. Click on the **Step 2 - Intel Graphics Media Accelerator Driver** and double click on the **Setup.exe**
2. Follow the instructions that the window shows
3. The system will help you install the driver automatically

Step 3 –Install LAN Driver

1. Click on the **Step 3 - Intel Ethernet Driver** folder and double click on the **PRO2KXP_v13_1_2.exe**
2. Follow the instructions that the window shows
3. The system will help you install the driver automatically

Step 4 –Install Audio Driver

1. Click on the **Step 4 - Realtek ALC655 Audio Driver v3.71** folder and double click on the **setup.exe**

2. Follow the instructions that the window shows
3. The system will help you install the driver automatically

Step 5 – Install Touch Screen Driver

1. Click on the **Step 5 – PenMount 6300 Touch Driver** folder and double click on **Setup.exe**
2. Follow the instructions that the window shows
3. The system will help you install the driver automatically

Appendix

A

FAQ

A.1 FAQ 1

Installing Windows 2000 from a USB CD-ROM Drive May Cause a "Stop 0x7B" Error

Answer:

Only if you install Windows 2000 SP3 version, the error will be automatically corrected.

Categorized List of Fixes in Windows 2000 Service Pack 3 (SP3)

<http://support.microsoft.com/default.aspx?scid=%2fsupport%2fservicepacks%2fwindows%2f2000%2fsp3fixlist.asp>

Q294820 - Installing Windows 2000 from a USB CD-ROM Drive May Cause a "Stop 0x7B" Error

<http://support.microsoft.com/default.aspx?scid=kb:en-us:294820>

PSS ID Number: 294820

Article Last Modified on 5/28/2003

The information in this article applies to:

Microsoft Windows 2000 Server SP1

Microsoft Windows 2000 Server SP2

Microsoft Windows 2000 Advanced Server SP1

Microsoft Windows 2000 Advanced Server SP2

Microsoft Windows 2000 Professional SP1

Microsoft Windows 2000 Professional SP2

This article was previously published under Q294820

SYMPTOMS

If you are using a Universal Serial Bus (USB) CD-ROM drive to install Windows 2000 on certain legacy-free computers, you may receive a "Stop 0x0000007B" Inaccessible_boot_device error message while booting from the installation CD. Because many legacy-free computers do not have a standard CD-ROM drive or floppy disk drive, the USB CD-ROM drive may be the only method for installing or recovering Windows.

CAUSE

Windows 2000 Setup does not support certain USB CD-ROM drives as bootable devices. This causes error message during the Text-mode portion of Setup.

RESOLUTION

Please contact your computer manufacturer for information about obtaining updated Windows 2000 Setup disks that you can use to boot your computer with a USB CD-ROM device.

STATUS

Microsoft has confirmed that this is a problem in the Microsoft products that are listed at the beginning of this article.

A.2 FAQ 2

What type of anti-glare treatment are you putting onto your touch screen and what is the LCD brightness reduction with this treatment?

Answer:

We use Low Reflection touch screen with Anti-Refelctive surface which incorporates "circular polarizer" films inside. It is new technology of Touch panel , which has several layers of films, applied to reduce the amount of reflection back into the users eye (Reflectivity: $1.5 \pm 1\%$) and increase "contrast ratio" of display in outdoor environment.

A.3 FAQ 3

Can I reboot the system immediately after long-term operating?

Answer:

It is recommended to reboot the system with interval and not to push the ON/OFF button twice at once that may cause long booting time or non-booting.
